UL AND TK'BLUE ANNOUNCE PARTNERSHIP TO HELP SHAPE THE TRANSITION TO A LOW CARBON ECONOMY

Franklin, Tenn. – UL, a leading provider of environmental, supply chain, sustainability, and corporate social responsibility software solutions, and TK'Blue, labeling and rating agency for eco-responsible transport, today announced a strategic partnership to deliver more comprehensive solutions for European companies that are transitioning to a low carbon economy.

Completely free for all freight carriers of all modes, the TK'Blue provides ratings and labelling of the overall impact of freight transport. Major enterprises such as Carrefour, Michelin and Saint-Gobain are already involved in the TK'Blue dynamic. Thanks to its numerous services, TK'Blue offers many advantages to customers of UL, mainly to support exact calculations of CO2 emissions / greenhouse gases (GHG) across operations and supply chain as well as facilitating the sharing of regulatory and administrative documents.

UL EHS Sustainability's PURE™ Platform is a leading suite of environment, health, safety, sustainability and supply chain software solutions designed for enterprise customers who want total connectivity and visibility into the overall performance of their organization. More than 2,000 organizations in over 20 major industries trust UL's tools to meet their expanding needs. Notable customers in France are Credit Agricole, Solvay and Engie. Nestlé utilizes UL EHS Sustainability software across its global operations and just recently won the 2017 Verdantix EHS Innovation Award for using the most innovative EHS technology to improve EHS outcomes.

Philippe Mangeard, President and Founder of TK'Blue Agency: "UL EHS Sustainability's finer consideration of the environmental quality of transport chains thanks to our TK'Blue rating confirms the alignment noticed by professionals between the economic performance of companies and the eco-responsible quality of their supply chain".

"All over the world our software solutions help ensure the accurate capture, management, and reporting of the sustainability information needed to enhance performance and drive operational excellence across all business areas," says Mark Ward, General Manager, UL EHS Sustainability. "We're excited to partner with TK'Blue, being able to offer our European customers additional value around assessing and improving their environmental performance."

Join TK'Blue and UL on Thursday, 31st May, 2:00pm (CET) for the French-language webinar "Boostez votre performance RSE : du reporting à la certification des transporteurs" and find out how your organization can optimize its environmental performance.

Its new PURE™ Platform is a full suite of environment, health, safety, sustainability and supply chain software solutions designed for users who want total connectivity and visibility into the overall health, safety, and sustainability of their organization. More than 2,000 organizations in over 20 major industries including manufacturing, healthcare, and construction & energy, trust UL's tools to meet their expanding needs. To learn more, visit www.ULEHSSustainability.com or call 888.202.3016.

About TK'Blue Agency

TK'Blue is a labeling and rating agency for transport, organized as a service platform. It measures, grades and values the eco-responsible performance of each of the players - carriers and contractors/freight forwarders - in compliance with the legislative and regulatory requirements relating to CO2, GHG and CSR emissions, at national and European levels.

Its European governance, composed of more than seventy representatives of all actors in the supply chain, enables it to ensure its legitimacy, credibility, evolution and independence in the long term.

The platform is accessible in SaaS mode on the Cloud, free for all freight carriers of all modes.
